Full Motion Desktop Mounting Solution Kits

The MPDSA Series arms are a sleek and stylish solution that deliver perfect landscape or portrait-oriented monitor positioning while freeing up valuable workspace. Choose from a multitude of configurations to fit any need.

There are two key elements that make the MPDSA's unique. First, the spring is heavy duty and adjustable. This allows these arms to handle a load from 5lb through 30lb, the widest range on the market. Second, MPDSA's allow you to lock down both, the tilt, as well as the landscape to portrait rotation of each monitor.

Ability to handle a heavier load and lock tilt and rotation, makes the MPDSA's a great solution for high use areas, such as a busy restaurant kitchen, where a lesser solution may sag or loosen over time. This is also key for applications where additional components must be mounted along side the monitor, which increase the overall load and possibility of sag.

Multipile Base Configurations Included In Kits

Maximize your MPDSA's usability by including four different mounting accessories that allows the MPDSA's to applicable for any desktop mounting application.

- Heavy duty spring adjusts from 5lb through 30lb loads
- Locking tilt and rotation suitable for high traffic applications
- Versatile, mounts to virtually any surface
- Base options included: flat surface, edge clip/wall, through-hole or pole/racking

(Edge Clip/Wall)

(Flush Mount)

(Through-Hole)

(Pole/Racking)

Model	Display Size	Min Mounting Pattern	Max Mounting Pattern	Max Weight per Display	Base Configurations	Tilt
